

MVC700N

1/4" Day/Night Color CCD Camera

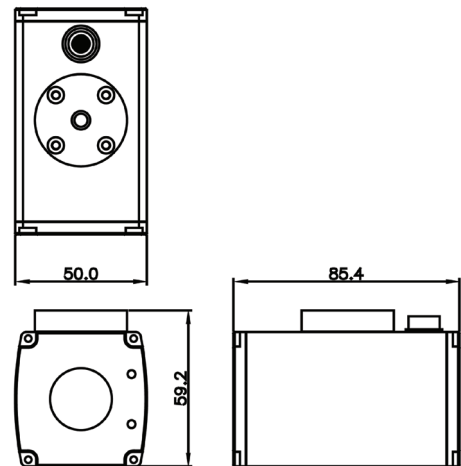

While the packaging may look the same "it's what's inside that counts." Our forward looking police vehicle camera is specifically designed for use in high vibration environments. All screws are secured with Loc Tite® and all connectors are soldered not crimped. A unique algorithm controls the auto focus function both extending the life of the lens and providing image stability to compensate for the movement of the vehicle.

Special Features

- Various AE Modes to optimize brightness and compensate for glare and blooming often associated when bright headlights are introduced into a dark scene.
- Rated for 24/7 continuous use
- 10X zoom enables the camera to zoom to a preset location with one touch (when used with Mobile Digital Video Recorders), perfect for clear close-ups of license plates.
- Full Three Year Warranty
